Hello,

I'm SHERIN, a Server Administrator from INDIA with 8+ Years of experience. I'm very passionate with Linux and Open Source technologies. Always love to learn new things.

I born in a poor family and struggled a lot to became in this position. I believe that gifted me lot of good qualities like, Dedication, Courage, HardWorking etc.

I specialize in web hosting technologies and got chance to work with multiple world leading web hosting providers and managed 5000+ servers with different control panel or controlpanel less servers. Other than top brands I used to work with start-up hosting providers. I believe from there I was able to gain more knowledge and experience, because there I was able to manage/participate A-Z activities of a web hosting company like (Billing, New Product Implementation, Server Setup, Order Provisioning, Promotions, Security Patching, Blogging, Website Maintenance ….)

Don't hesitate to contact me at me@sherinsha.in if you need my help in any matter, either Technical or Personal.

Have a nice day!

Regards,
Sherin Shamsu
